Report Highlights:

Includes PSD changes: Yes

Includes Trade Matrix: No

Unscheduled Report

Buenos Aires [AR1], AR

Table 1: Supply & Distribution	1
Table 2: Imports	2
Table 3: Exports	3

The 2001 Argentine harvest of peaches for processing was forecast at 115,000 metric tons, with canned peach production is estimated at 80,000 metric tons. This 14 percent increase in production is due to favorable climatic conditions, (no rain, no frosts) during the entire growing period. Furthermore, the fruit is considered of very good to excellent quality, and producers claim that this is one of the best seasons they had for many years.

Domestic consumption is expected to increase by 5 percent due to: a) reduced retail prices, resulting from abundant fresh fruit, and therefore cheaper price paid to producers for raw material, and b) the recent resolution from the Ministry of Economy No 27/01 dated April 10, 2001, which increases to 35 percent import duties on several products (including canned peaches) coming from non-Mercosur countries, including Chile.
